Profile

Senior web developer with 8 years of experience in PHP, Laravel, WordPress and WooCommerce. Since 2021 I have worked on a CRM system for real estate agents, focusing on API integrations with Hemnet, Scrive, Fortnox, Visma, Microsoft Graph and others. Uses AI tools daily to work faster. Responsible, solution-oriented and quick to get up to speed in new codebases.

Strengths

- API integrations with Swedish business systems (OAuth, webhooks, data sync)
- Troubleshooting and bug fixing in PHP/Laravel, including other people's code
- New features in existing systems
- Performance, SQL optimisation and security
- WordPress and WooCommerce

Experience

Senior Web Developer, Prek – CRM for real estate agents

2021 – present

- Take part in the team's technical decisions.
- Build integrations that publish property listings on Hemnet and other listing platforms.
- Built e-signing with Scrive, bidding with Cetti, and invoicing with Visma and Fortnox.
- Developed a Microsoft Graph integration: sending email, creating calendar events and tasks, and syncing contacts.
- Develop Laravel APIs so customers can easily access their data, and a Vue mobile app for viewings and bidding.
- Continuously upgrade PHP and dependencies to keep the system secure and maintainable.

Web Developer, Angry Creative – e-commerce with WordPress and WooCommerce

2018 – 2021

- Worked on both backend and frontend – from small tasks to complete online stores, including multilingual ones.
- Built custom WordPress plugins, including PDF, SMS, a global cart and cookie handling.
- Responsible for maintaining clients' e-commerce sites: updating WordPress, themes and plugins, and fixing the errors that appeared after the updates.

Founder and owner, Zalin Store – my own online store

2018 – 2020

- Started and ran, alongside my employment, an online store for mobile and computer accessories.
- Gained experience of the whole chain as an online retailer: development, operations, purchasing, VAT and tax.

Intern, Siemens

2017 – 2018

- Built four small projects with ASP.NET MVC, AWS and Node.js together with three other interns.

Personal projects

Dagocal

dagocal.com

A web app for creating digital advent calendars and sharing them with others. Runs on my own VPS with daily backups, status reports and a health check every five minutes.

Petras Cake

petrascake.se

An ordering system for cakes where customers choose the number of layers, shape, filling and extras. In production for several years.

Zalin Store

No longer active

My own online store for mobile and computer accessories (2018–2020). I built the store and ran the business – not just the development but also purchasing, VAT and tax.
